

### **3. Student assignments**

Based on projected capacity at available schools, CMSD has identified school options where most students from closed buildings will be assigned for the 2010-2011 school year (see table below). Upon approval of the Board plan, the district can begin formulating student assignments for the upcoming school year. The student assignment process will take more than a month to complete. If the Board approves the plan in early March, assignments will be communicated to families in April. After neighborhood school assignments are delivered, students and families will have the opportunity to opt into a district choice school and request a transfer. For full detail on student assignments, see below process and timeline.
